Nuvla edge computing B2B platform as a service

TAKE CONTROL OF YOUR EDGE

Do you need to process data close to where it's generated, enabling you to act on insights in near-real time? You'll need to operate an edge computing infrastructure. SixSq provides a management platform and edge software, so you can set up your own future-proof solution, in minutes. The solution is application-centric, cloud-neutral, hardware-agnostic and container-native, with a simple and scalable pricing policy.

COSTS

- Retrofit existing edge hardware, or use any new hardware
- Save up to 75% on public cloud costs
- Increase workforce productivity

SOVEREIGNTY

- Fine control over data location
- Works with any cloud (public, private and hybrid)
- Respects data legislation
- No lock in solution

AUTONOMY

- Edge apps run independently of network and cloud
- Platform is cloud-neutral
- Enterprise grade SLA, immune from network & cloud outage

AS A SERVICE

- Full orchestration of edge devices & apps from the cloud
- Hosted in Switzerland, Nuvla is a B2B platform as a service
- T&C make business frictionless and straightforward

CYBER SECURITY

- AI powered cyber security apps defend your edge infrastructure
- Zero config security eliminates human error
- Scaling is simple and predictable

MARKETPLACE

- Delivers apps via the Nuvla marketplace
- For Service providers, Nuvla enables edge revenues
- For app vendors, marketplace accelerate go-to-market

FOR YOUR BUSINESS

Nuvla delivers benefits to many sectors including: retail, transport, logistics, manufacturing and smart cities.

Business departments have a single pane of glass to manage their own edge assets and apps, delivering business insights and agility across the organisation.

FOR YOUR IT

For the IT operations, no need to install and operate new software. Nuvla enables remote autonomous operations, ensuring your infrastructure is protected by the latest security policies and application updates. We help you rationalise your operational procedures, improving your security posture and costs.
